## An Overview

**Moon Creations** is providing dynamic way of software solutions, and specializes in the development of high quality products and cost effective IT solutions. We are a market and technology driven company. Our core competence is software technology. We offer unmatched service to our clients. Our team of professionals is dedicated to provide information technology solutions adapted to global clients.

**Moon Creations** is your ideal partner for the development of IT solutions. The mission of **Moon Creations** is to utilize cutting edge technology to offer reliable and efficient business application solutions, and consulting for the communications, corporate, financial and securities industry.

We are very focused on our core competencies. We strive to be the best at every thing we do. Our primary goal is to provide your company with the software tools needed to address real world business issues and opportunities. This focus has allowed us to become a true "master of our trade". Since the systems and business requirements are constantly changing due to technology and growth, we are committed to a continuous research and development in order to provide significant enhancements as a part of our standard package, to meet our clients growing needs.

# Solutions

**Moon Creations Solutions** integrate best-of-breed technologies with unique deployment methods for maximum performance and scalability. With expertise in turnkey solutions, complex database systems and all leading environments including Linux, **Moon Creations** develops tools and platforms for e-Business and data management, mining and analysis.

**Moon Creations** offers expertise and proven experience in a wide range of software-based, data-driven solutions. Offering innovation as well as excellent return on investment, **Moon Creations** solutions include:

## E-Business

Providing highest scalability and most accurate and sophisticated personalization to B2B and B2C environments through advanced e-Business and e-commerce solutions.

## Business Intelligence

A leader in data warehousing solutions, **Moon Creations** custom-builds robust, large-scale systems for the sophisticated warehousing, retrieval and analysis of mission-critical data.

## Outsourcing

From needs analysis to ongoing support, **Moon Creations** develops end-to-end solutions for even the largest and most complex system needs. **Moon Creations** also out sources complete MIS services.

## Application Integration

**Moon Creations** has experience in the development and management of enterprise legacy systems, on one hand, and interfacing major applications and communication protocols, on the other. **Moon Creations** integrates vast amounts of disparate, unrefined data into reusable information assets. **Moon Creations** enables customers to easily collect, validate, organize, administer and deliver information assets to realize more value from their enterprise information, reducing costs and increasing profitability.

## Linux

With broad expertise in this breakthrough programming language, **Moon Creations** offers a complete suite of advanced Linux-based solutions and services, including tools, integrated systems and a Linux Support Center.

# Services

**Moon Creations** diverse Services help companies enhance their performance in today's digital world, and include top-level consultation, remote R&D and comprehensive customer support. We Provide a range of advanced data-driven solutions, services and products for the digital age.

From e-Business, e-commerce and business intelligence, **Moon Creations** answers complex business needs for leading companies worldwide. Integrating knowledge with the latest hi-tech innovation, **Moon Creations** offers tools and ideas that excel with outstanding return on investment.

**Moon Creations** Solutions integrate best-of-breed technologies with unique deployment methods for maximum performance and scalability. With expertise in turnkey solutions, complex database systems and all leading environments including Linux, **Moon Creations** develops tools and platforms for e-Business and data management, mining and analysis.

We can take the system you have now and design enhancements, upgrades, or even transform the system entirely. We can develop innovative approaches while still preserving your investment in software. We can access core competencies within **Moon Creations** to assist you regardless of where you are in your project cycle: planning, implementation, training, or even transitioning to a whole new system.

Here are some of the ways our Consulting Services can help you:

- System Analysis & Integration
- Application Development
- Technical Training
- Custom Software Development
- Workflow Systems Development

## Area of Expertise:

**Moon Creations** Services team is a dedicated group of entrepreneurial professionals who want to help you integrate our solutions into your business as quickly and easily as possible

- Windows application programming
- Windows GUI design
- Windows System Programming
- OLE Programming
- Setup Programs for Windows applications
- Database programming
- Game programming
- Network programming
- .NET
- Web development, design, promotion
- Web server applications
- Web database applications
- E-Commerce

## Development Tools:

MS Visual Studio

MS SQL Server

TCP/IP

Java

MSQL

Sockets

C/C++

MS ACCESS

HTTP

PHP

ORACLE

POP3

Java Script

Assembler

SMTP

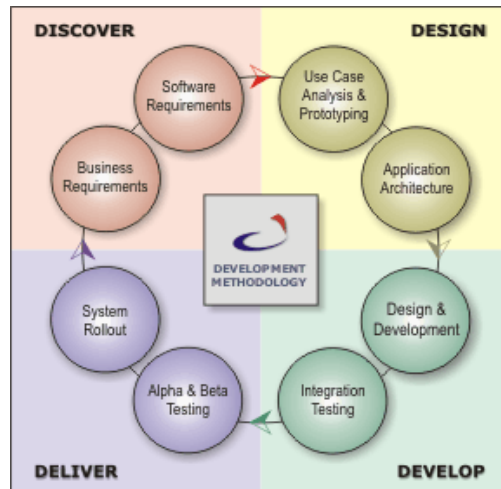

VB Script

ASP

SNMP

# Development Methodology:

**Moon Creations** follows industry accepted procedures and processes to ensure highest quality output for its customers. We have devised a 4D's (Discover, Design, Develop and Deliver) Methodology based on widely accepted Software Development Life Cycle (SDLC).

## Discover:

Business requirements  
Software requirements

## Design:

Use case analysis  
Prototype  
System architecture  
Application design

## Develop:

Subsystem design  
Subsystem development  
Unit testing  
Integration testing

## Deliver:

Alpha testing  
Beta testing

## Products:

**Moon Creations** ensures that its customers get the very best from their product development. The requirements of our customers are our top most priority. Our customers come first and will receive ultimate worth and value through proficiently managed facilities, and high quality products. With the help of the clients, **Moon Creations** offers them with products that satisfy their needs. We provide our clients most convenient access of communication with in the software requirements and Let them to analyze the product in the form of demos with the regular intervals of time. Therefore all of our clients believe on our best services and take advantages of it.

# Once you have decided.....

Once you have decided **Moon Creations** for contract work, the next steps are simple enough:

**Step 1:** Let us know what kind of work you are interested in having us to do. We will then send you samples of our previous work in this area

**Step 2:** After you have examined our work, we will request to work on a short pilot project. This will be a very reasonably priced short term project that will prove we are capable of satisfying your programming needs. Our experience has shown this step to be instrumental in building the foundations of a strong, professional and lasting business relationship.

**Step 3:** Upon completion of the pilot project, we will anticipate a formal project order. As we become familiar with the details of your project, we will request that you provide the E-mail address of an individual(s) to whom our programmers may direct questions.

**Step 4:** We will submit a feasible completion deadline and price. A payment schedule can then be worked out on a per project basis. Generally, 20% down is standard. The remaining payments will coincide with completion by MOON CREATIONS of prearranged milestones.

## **The more details, the better...**

Obviously, the more detailed the better! Our programming staff is very competent and has a great deal of expertise. Therefore we don't require a great deal of background information. However, we would like a document which thoroughly describes the user interface, data structures, and platform requirements, supported languages, sample screen images, etc. This is an iterative process and we are always able to nail down what we need by a few rounds of meeting with the client.

## **What deliverables do we supply...?**

As described in our profile, payments to us come at scheduled milestones as work is completed. We will provide you with examples of the work completed to date for you to review. At that time, we can discuss changes which are required or modifications to the original design specs. You are welcome to discuss this with us at any time during the project. On completion of the job we will provide you with full source, technical documentation and development notes from our programming staff. We expect to receive acceptance or a detailed list of exceptions within seven days of submitting the completed work. Final payment should follow at that time. We guarantee that the product will work as per the agreed on design specs.

## **Bug fixes and ...**

We will fix at no charge to you any bugs brought to our attention which deviate from the agreed on design specs. Bugs which are due to omissions in the design specs will be fixed on a T & M basis. We will be delighted to provide maintenance for all work we have done on a T & M basis.
